

Journal of Computational Methods in Sciences and Engineering

Vol. 1, Number 1, 2001

Contents

- Leading Distorted Wave Theories and Computational Methods*.....1
Dž. Belkić
- Solving Bordered Almost Block Diagonal Linear Systems Stably and Efficiently*.....75
B. Garrett and I. Gladwell
- Computational Aspects of Combinatorial Quantum Chemistry*.....99
P.G. Mezey
- On Smoothing of the Crank–Nicolson Scheme for Nonhomogeneous
Parabolic Problems*.....107
A.Q. Khaliq and B.A. Wade
- An Infinite Family of Second Order Weak Explicit Runge-Kutta Methods*.....125
J. Vigo–Aguiar and A. Tocino
- Mathematical Analysis of a Nonstandard Finite Difference Scheme for the Fisher
Equation with Nonlinear Diffusion*.....135
R.E. Mickens
- On the Construction of Exponentially-Fitted Methods for the Numerical Solution
of the Schrödinger Equation*.....143
A. Konguetsof and T.E. Simos
-

Subscription Information 2001

Volume 1, published quarterly. Subscription are accepted on a prepaid basis only. Issues are sent by airmail printed matter post (postage is included in the subscription price).

2001 rates are: Institutional rate £200.00 UK and Europe, Rest of the World \$300.00; individual rate £50.00 UK and Europe, \$75.00 Rest of the World.

Please send all requests regarding subscriptions and claims to

Journal of Computational Methods in Sciences and Engineering

Vol. 1, Number 2s–3s, 2001

Contents

<i>Extrapolation Methods for Infinite Multiple Series and Integrals</i> D. Levin and A. Sidi	167
<i>A Novel Class of Padé Based Methods in Spectral Analysis</i> P. Barone and R. March	185
<i>Overcoming Noise Sources in Multiexponential Fitting: a Comparison of Different Algorithms</i> O. Alejos, C. de Francisco, J.M. Muñoz, P. Hernández-Gómez, and C. Torres	213
<i>Iterative Diagonalization of a Large Sparse Matrix Using Spectral Transformation and Filter Diagonalization</i> G. Nyman and Hua-Gen Yu	229
<i>Lanczos Approach to Molecular Spectroscopy without Explicit Calculation of Eigenfunctions</i> Hua Guo	251
<i>Analytic Reconstruction Algorithms in Emission Tomography with Variable Attenuation</i> L.A. Kunyansky	267
<i>Computational Techniques for Prolate Spheroidal Wave Functions in Signal Processing</i> T.V. Levitina and E.J. Brändas	287
<i>Experiments in Wavelet Shrinkage Denoising</i> C. Taswell	315
<i>Time-Frequency and Time-Scale Approach to Magnetic Resonance Spectroscopy</i> J.P. Antoine and A. Coron	327
